Line Analysis

CONFIG	The ADSL line serving phone number 925-828-5182 uses ADSL profile # 25.
DN STREAM ERRORS	During the measurement period of 8 hours and 15 minutes, the line experienced 15 minutes of excessive code violations or errored seconds in the downstream transmission path.
UP STREAM ERRORS	During the last measurement period of 8 hours and 15 minutes the line ran error free in the upstream direction.
DN STREAM SPEED	The line is running at the maximum bit rate of 384 kbps.
UP STREAM SPEED	The line is running at the maximum bit rate of 128 kbps.
DN STREAM S/N	The line noise margin is 12dB, which is above the target noise margin of 6dB.
UP STREAM S/N	The line noise margin is 18dB, which is above the target noise margin of 6dB.
DN STREAM POWER	The line power is -15dBm, which is below the maximum of 20dBm.
UP STREAM POWER	The line power is -2dBm, which is below the maximum of -13dBm.
PILOT TONE	No pilot tone was detected.
BRIDGED TAPS	The line appears to have a bridged tap. The tap has no effect on channel bandwidth.
LOOP	Loop length is estimated at 12220 feet of equivalent 26 awg cable.
CROSSTALK	No crosstalk was found.
INTERFERENCE	Single frequency interferers were found at 349 kHz.
UP BURST ERRORS	Upstream burst errors were found during the measurement period.
DOWN BURST ERRORS	No burst errors were found.

Port configuration for SNRMCA11H02 on 2003-06-15 00:00:00.0

Rack: 2 Shelf: 1 Card: 5

Local intrer

The screenshot displays a web-based interface for managing network equipment. At the top, the URL is http://broadband.sbc.com/summary/equipmentView.jsp?cli=SNRMCA11H02&nextpage=http://broadband.sbc.com/summary/equipmentView.jsp. The interface includes a menu bar with File, Edit, View, Favorites, Tools, and Help. Below the menu is a toolbar with Back, Forward, Stop, Home, Search, and Favorites buttons.

The main content area shows a rack-level view with four shelves. Shelf 1 contains one card (LT-21-5). Shelf 2 contains four cards, each with four ports (Port 1 to Port 4). The port status table indicates all ports are in service. Below the rack view is a legend for ports, listing four states: In Service, Network Ready; Out Of Service, Unavailable; Out of Service, Maintenance; and Out Of Service, Unavail/Maint.

Below the rack view is a legend for cards, listing six types: NT - Network Interface, Line Terminator, In Service, Line Terminator, Out Of Service, Alarm Control Unit, Extender Card, and No Data. The 'Selected' status is highlighted for the Extender Card.

A summary section at the bottom provides the port configuration for SNRMCA11H02 on June 15, 2003, at 00:00:00.0. It lists the rack (2), shelf (1), and card (5) details, along with the local interface information.
